### Winterization of Mercruiser Inboard & Sterndrive Marine

To do a complete winterization, you MUST be able to run the engine and bring it up to operating temperature. To do this, your boat must be in the water or be attached to a water supply via a hose and suitable adaptor that will allow an uninterrupted supply of water to the engine. STEP 2

### Winterizing Mercury Inboard Engine - e13components.com

Keep moist air from getting inside your engine and tanks. Seal air inlets, crankcase and transmission breathers, exhaust outlets, and tank vents. Fabricate caps from plastic containers and tape them in place with plastic tape to create an airtight seal. Try to do this on a dry day so you do not seal in moist air.

### Winterizing Boat Engines And Drives - The Boater's Guide

For full extended winter storage, after completely draining the cooling system, Mercury MerCruiser requires the use of propylene glycol antifreeze (with a rust inhibitor for marine engines) in the seawater section of the cooling system. The fuel system must have fuel stabilizer added and the system must be fogged with 2-cycle oil.

### Winterizing your Gas Inboard or Sterndrive | West Marine

Disconnect the fuel line going to the fuel filter. Mix up gas and 2 cycle oil is mixed up and connect it to the fuel filter. Run the motor to warm it up with the mix, change the oil and the motor is fogged so to speak.

### **winterization | PerfProTech.com - Mercury Marine | MerCruiser**

Winterizing your Mercury outboard is the last step before sending the motor into hibernation at the end of the season. As a precursor to the winterizing process, mixing fuel stabilizer into the last tank of fuel for the final excursion of the season allows the fuel stabilizer to circulate throughout the motor, coating the various fuel system surfaces with the stabilizer.

### **new to winterizing inboard Mercruiser | Boating Forum**

Adding Antifreeze and Fogging Oil to an Inboard engine. The procedure is a little different for an inboard power plant. Warm the engine up to operating temperature, just like with a sterndrive. Instead of using a winterizing kit, you'll need a five-gallon bucket, and enough antifreeze for your engine and related plumbing (at least two gallons).

### **Winterizing Mercury Inboard Engine**

There are two methods of winterizing a raw-water-cooled engine or the raw-water side of a freshwater-cooled engine: draining the system and leaving it dry, or filling it with winterizing antifreeze (propylene glycol). The preferred technique for inboard engines, circulating antifreeze throughout the cooling system, is better for an engine.
